THE COMPANY

Founded in 1985, UC4 Software is the leading provider of workload automation and IT process optimization solutions that ensure core business processes and enterprise information systems run faster, more accurately and without interruption. Through its global network of sales office and implementation partners, UC4 Software provides outstanding levels of service and support to more than 1,500 customers.

UC4 WORKLOAD AUTOMATION SUITE

UC4 Workload Automation Suite automates the execution of end-to-end business processes across multiple applications and operating platforms, allowing organizations to exceed IT service level agreements, speed implementations, lower application lifecycle costs and increase productivity throughout the enterprise.

From enterprise job scheduling, business application integration, data center operations through to management services, UC4 offers organizations comprehensive, innovative workload automation solutions. UC4 Workload Automation Suite provides enterprise-wide control and visibility of all processes and resources that is unsurpassed in breadth of infrastructure coverage and depth of application integration. UC4 Workload Automation Suite allows users to dynamically provision IT resources in response to changing business demands. Access to historic performance data combined with advanced trend analysis tools allow enterprises to become pro-active and strategic in how they manage, monitor and control workload activities.

SERVICES & PARTNERS

UC4 Software delivers more than just software. 45 percent of the UC4 staff is dedicated to professional services and customer support. Web-based customer care programs, user groups and forums as well as dedicated account management ensure that UC4 establishes and maintains close business partnerships throughout the entire life cycle of its relationships with customers. Services include consulting, from proof of concept to implementation, upgrades and migrations, training and 24x7 support around the globe.

Strategic alliances and partnerships between UC4 and global technology leaders ensure alignment of data center automation or application integration solutions with continued innovation – protecting customers' existing IT investments while enabling scalability and growth.

PARTIAL LIST OF CUSTOMERS

More than 1,500 companies worldwide have successfully enhanced application processing performance and improved IT efficiency using UC4's Workload Automation Suite. Customers include American Suzuki Motor Corporation, AT&T Wireless, AXA Aurora, Bobst, Cadbury Schweppes, Citibank, Columbia University, Commerzbank AG, Cummins Inc., DoubleClick, Eastman Kodak, eBay, General Electric, Mattel, National Bank of Canada, OMV, Panasonic, Robert Bosch, Sandvik Information Technology, Siemens, Sun Microsystems, Symantec, T-Systems, University of Illinois, US Navy, and Xansa NHS SBS.
